---

## SOFTWARE DEVELOPER

Self-motivated and dependable Software Engineer with over 3.5 years of professional experience specializing in full-stack development. Proficient in ReactJS and Python, along with various JavaScript frameworks and databases. Adept at delivering scalable solutions for international clients, ensuring high-quality performance and efficiency. Possess excellent communication, project management, and technical leadership skills.

## WORK EXPERIENCE

---

### Cartmade Ecommerce • Kathmandu • 09/2024 - Present

#### Web Developer • Full-time

- **Designed and implemented integrations** with third-party APIs (e.g., Dropbox) to enhance backend functionality and streamline business operations.
- **Built custom features and functionalities** leveraging Shopify's ecosystem, including APIs, webhooks, and app development frameworks.
- **Optimized performance and SEO** to improve user experience, store speed, and search engine visibility.
- **Collaborated with cross-functional teams** to align e-commerce strategies with design, marketing, and business goals.

### MME Solutions • 01/2023 - 01/2024

#### Full Stack Developer

- Collaborated with US-based clients to design and implement full-stack solutions, leveraging ReactJS for the front end and Python for the backend, ensuring robust performance and scalability.
- Developed and optimized responsive UI/UX features using ReactJS, enhancing user experience across multiple devices.
- Designed and deployed scalable microservices using Node.js and AWS Lambda, enabling efficient, cloud-based solutions.
- Improved database operations using MongoDB and MySQL, focusing on performance optimization and high scalability.
- Seamlessly integrated third-party APIs and handled data migration, ensuring smooth and efficient workflows across multiple platforms.

### Dhara Networks • 01/2021 - 01/2023

#### Software Engineer

- Led the development of billing submission SaaS platforms for international clients using Angular and Node.js, ensuring high availability, reliability, and scalability of the systems.
- Architected and implemented RESTful APIs and microservices using Typescript, promoting modularity and code reuse across the application.
- Leveraged containerized environments with Docker to ensure consistent deployment, improve development workflows, and facilitate collaboration across teams.
- Implemented React-Redux for state management in complex frontend applications, ensuring predictable state updates and optimized performance.
- Utilized AWS services like EC2, S3, and Lambda to design cloud-native solutions, enhancing application availability and cost efficiency.

- Conducted data migration from legacy systems to modern databases like SQL and MongoDB, ensuring seamless transition with minimal downtime.
- Optimized database management by fine-tuning queries, indexing, and utilizing caching strategies, resulting in faster data retrieval and reduced latency.
- Led cross-functional team discussions and collaborated with project stakeholders to deliver features aligned with business goals, adhering to Agile development practices.

## EDUCATION

---

### **Bachelors In Computer Science Engineering**

Galgotias University • Greater Noida, India

## SKILLS

---

Angular, API Integrations, AWS (Lambda, S3), Communication, Docker, English, Express.js, Git, GraphQL, Hindi, HTML/CSS, JavaScript, Jest, Microservices, MongoDB, MySQL, Nepali, Node.js, Project Management, Python, ReactJS, REST APIs, SQL Optimization, Technical Leadership, Typescript
